Re: Client Reference-Flames Community Arenas

For: Chad Sherger, Eco Coatings & Exteriors

The Flames Community Arenas was faced with two problems, an aging metal roof that was constantly leaking and a building whose exterior was in need of a cosmetic face lift.

Chad and his team of experts provided us with the solution. They applied Polymer Science's Smart Roof coating to seal and waterproof the metal roof permanently solving the leaking problem. PSC's Better Than Paint product was applied to seal and waterproof the stucco giving the Flames Community Arenas a brand new look without the costly expense of replacing the stucco.

If you are looking for the answer to your facilities problems then look no further than Chad Sherger & Eco Coatings. Not only will they provide the right solution to solve your problems, but they will deliver the solution with professional service that is on time, on budget and with unparalleled customer service.

Yours truly,
