

on time. on budget. every time.

Flames Community Arenas

Building Envelope Restoration

The Flames Community Arenas is housed in a building that is more than 40 years old. It faced two major problems. The metal roofing was failing and the stucco exterior was compromised and deteriorating.

Faced with a costly building envelope replacement, the Flames Community Arenas turned to Sherger Construction to devise a cost effective solution.

Polymer Science Corporation (PSC) - SmartRoof System

Sherger Construction recommended and applied a seamless acrylic elastomeric roofing system to permanently seal and waterproof the metal roof. This completely resolved the issues caused by the existing system failures.

PSC - Better Than Paint

PSC Better Than Paint was applied to the stucco surfaces permanently sealing and waterproofing the envelope. This approach also gave the building a brand new look.

Project Reference

"If you are looking for the answer to your facilities problems then look no further than Chad Sherger & Eco Coatings/Sherger Construction.

Not only will they provide the right solution to solve your problem, but they will deliver the solution with professional service that is on time, on budget and with unparalleled customer service."
